## AUCTION 28

Closing October 3 1993, Sunday, 6:00 p.m. USA Pacific Time

This auction is about a two-thirds longer than the previous sales. In it are a number of series which will be new to English-reading collectors, especially especially the Russian, Czech and Hungarian-language sections on the following pages. For Canadians there are a number of the colonial series available in high grades as well as a broad assortment of local trade checks. Germany collectors should find something of interest in the large assortment described here, especially the number of naval tokens. A good sample of USA military tokens can be found in this catalog's early pages.

Lot descriptions are of necessity brief and oriented to numismatists. Sizes are in millimeters, although larger paper pieces are often in inches. Tokens are round unless otherwise indicated. Materials are shown as Al, Br, Cop, Ir, Ld, Nkl, Zn or Pl(astic). When parentheses are used it means that the information enclosed is not in the token legend or describes some device on the token. Catalog numbers are often used to aid description, e.g. (L#101.3) and refer to the most standard U.S. work on the topic at hand. Since listing each reference would be too cumbersome, please write if you need to know which. Dollar values written simply (\$5) mean a suggested bidding range. An MB or Res. enclosed with a dollar value in parentheses (e.g. (MB\$25)) means a "Reserve" or "Minimum Bid". Grading can be only approximate in a series as varied as tokens. Especially when tokens are crudely made, grading is at best subjective. I try to be conservative and in most cases have reduced items by one grade where there is any question in my mind. Comments on my listings and methods of operation are always welcome.

I will accept bids over the phone during the week prior to closing. Current bid levels are available from the computer. However if you request such information, you must bid at least 10% over the highest in order to have your new bid qualify. For items quoting under \$10, you must bid at least \$1 more to qualify. For those who like to call in bids at the last minute, I will have all current bids posted during the last week before closing, but often at the end of the last day this is not possible when they come in rather quickly. 98% of all successful bidding is accomplished with high bids by mail.

Few pieces come through my auctions with the capacity to evoke such an immediate sense of tragedy as do the Chernobyl nuclear disaster cleanup award in Lot 58 and the three-alphabet token from Sarajevo, lot 1673. The atomic plant disaster happened on the border of Ukraine and Belorus in April, 1986. Six hundred thousand persons helped in scrubbing down the plant and surrounding countryside. Every one of them was affected by radioactivity to one degree or another. Some fissionable residue will remain for 25,000 years.

No one reading this should have any doubt about the location of Sarajevo or what has been taking place there. The token on sale here is remarkable because it features the same Serbo-Croatian language legend in Arabic, Cyrillic and Roman characters. It was issued by a factory canteen for the employees sometime before WWI when there was at least a commercial amiability among the city's ethnic divisions.
